FAS-WC08

Smart Desktop Wireless Charger 5 In 1

This sleek and innovative device combines the power to charge smartphone, smartwatch, and earbuds simultaneously, all while doubling up as a digital clock and night light. With a charging capacity of 15W for smartphone, 2.5W for smartwatch, and 5W for earbuds, this versatile charger ensures speedy and efficient charging for all your devices. The unique forklift-shaped design adds a touch of playful charm to any space, making it an eye-catching addition to your home or office. Say goodbye to messy cables and embrace the convenience of a single, multipurpose charging solution that keeps your devices powered up while keeping you on schedule with its digital clock display and creating a soothing ambiance with its built-in night light.

UV PRINTING
UV ROTARY PRINTING

UV Printing guarantees that the design printed is extremely durable, retains all graphic details and faithfully reproduces the colours. UV Rotary Printing allows to print on full outer area of cylindrical objects such as flasks, water bottles, tumblers etc.

LASER ENGRAVING & METAL MARKING

Laser engraving, which is different from laser marking, is the practice of using laser to engrave an object. Laser marking on the other hand just discolors the surface, without cutting onto the surface. The technique does not involve the use of inks, nor does it involve tool bits which contact the engraving surface and wear out.

DTF & HTV ON TEXTILES

DTF Printing (Direct to Film) allows to print on textiles without leaving a mark around the design. An ideal solution to get full color images and supreme quality products.
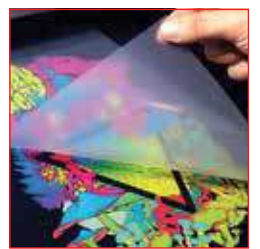

HTV (Heat Transfer Vinyl) is a cost effective alterntive for DTF.

SUBLIMATION

Sublimation involves printing onto a sheet of special paper, then transferring the image onto another material (usually polyster or a polyester mix). Allows to print full color customized products in a short period of time.
